ABSTRACTED-PUB-NO: DE 20217531U

BASIC-ABSTRACT:

NOVELTY - A snoring prevention unit (1) has a collar around a sleeper's neck with microphone (2) near the soft palate and vibrator (3) under a two part washable cover (1', 1'') and connected to a control unit (5) to recognize snoring and actuate the vibrator.

USE - Snoring prevention unit.

ADVANTAGE - Provides a vibration signal to stimulate tightening of the soft palate and stop snoring without waking. Does not disturb the sleeper's natural position like headphones or carry the same risk of waking.

DESCRIPTION OF DRAWING(S) - The drawing is a perspective of the neck band and control unit.

Snoring prevention unit 1

Two part washable cover 1', 1''

Microphone 2

Vibrator 3

Control unit 5
